## **Bluewater Energy Solutions Awarded Operations and Maintenance Services for the Plainfield Renewable Energy facility.**

*Project located in Plainfield, CT and Bluewater Energy Solutions provides Plainfield Renewable Energy with operations and maintenance services.*

The Plainfield Renewable Energy facility is a wood burning biomass facility with roughly 37.5 MW of generating capacity. The plant uses wood available from construction and demolition debris, recycled wood pallets, and land clearing materials to produce energy. The biomass plant features a wood storage yard, fluidized bed gasification system, condensing steam turbine generator, cooling tower, ash silo, scrubber, bag house, electrical switchyard, storm water storage including collection and treatment, and balance of supporting plant systems. Bluewater Energy Solutions will provide operations and maintenance services for the biomass facility.

### **About Bluewater Energy Solutions**

Bluewater Energy is a leading provider of startup and commissioning, plant operations and maintenance support, consulting, industrial cleaning and project management services specializing in gas turbine, coal, biomass and industrial markets. Started in 2003, Bluewater was established by a group of seasoned energy professionals in response to a growing need within the energy industry for a cost effective, safety minded, reliable service group. Our management team is comprised of industry experts who have attained the global experience, knowledge, financial depth and reputation for exceeding our client's expectations. With a wide variety of skill sets and expertise, we can quickly understand your needs and provide innovative solutions.
