

Atlanta, GA. | August 1, 2008

Bluewater Energy Solutions has entered into an agreement with Dominion Energy, Virginia City Hybrid Energy Center.

Project located in St. Paul, VA and Bluewater Energy Solutions will provide Dominion Energy construction services and startup/commissioning services.

Bluewater Energy Solutions is pleased to announce that it has entered into an agreement to perform construction services and startup/commissioning services for the Virginia City Hybrid Energy Center, located in Virginia.

Construction has begun on the Virginia City Hybrid Energy Center, a 585-net megawatt coal fired generation facility near St. Paul, VA, in Wise County. The project broke ground in August of 2008 and is slated for completion summer of 2012. Major equipment at the plant includes a Foster Wheeler boiler fueled by coal and biomass; an Allied Environmental air pollution control system; a Toshiba steam turbine generator; and an air-cooled condenser to cool and convert steam to water for re-use. Emerson Process Management will provide the distributed controls system.

About Bluewater Energy Solutions

Bluewater Energy is a leading provider of startup and commissioning, plant operations and maintenance support, consulting, industrial cleaning and project management services specializing in gas turbine, coal, biomass and industrial markets. Started in 2003, Bluewater was established by a group of seasoned energy professionals in response to a growing need within the energy industry for a cost effective, safety minded, reliable service group. Our management team is comprised of industry experts who have attained the global experience, knowledge, financial depth and reputation for exceeding our client's expectations. With a wide variety of skill sets and expertise, we can quickly understand your needs and provide innovative solutions.
